Authorised Dealer

Manufacturer of Best Quality multilayered Plastic Water storage tanks (500 Ltrs - 5000 Ltrs)

WHY BUY CITYTANK

Best Quality Plastic water storage tanks are designed and manufactured with latest state of art machineries with experienced technical team.

100% Virgin, Recyclable, UV stabilized and Food grade raw material guarantees the superior performance of products for long lasting out door use.

The products are strong and durable, Anti bacterial and Algae proof. So it is suitable for storage of drinking water in all weather conditions. Products can be used to store liquids other than water. Customers are requested to confirm with our technical team, if want to store special chemicals.

Excellent aesthetic look with best product finishing increases beauty of the place where installed.

Superior quality Rotational molded, double layer, UV stabilized lids with the tank ensures the quality of the water stored in the tank. The lid is designed to hold the tank thread so tight that it will never be removed even if there is heavy wind.

Made in Odisha with best quality to assure 11 years of Guarantee against manufacturing defects.

Multi layer products are available with different colors.

Full Capacity Guaranteed.

Special Rotomolded products can be designed and developed as per the customer requirement.

INSTALLATION GUIDELINES :

CITYTANK customers are requested to follow the installation guidelines to avoid damage of the products due to mishandling

Care must be taken during transportation of the products.

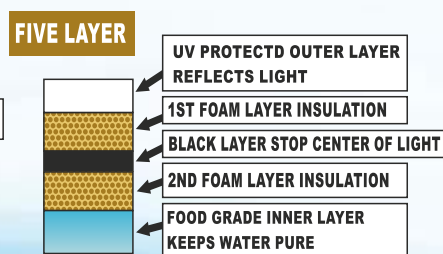

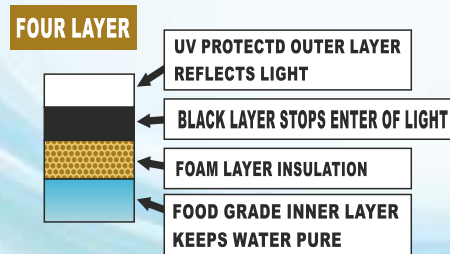

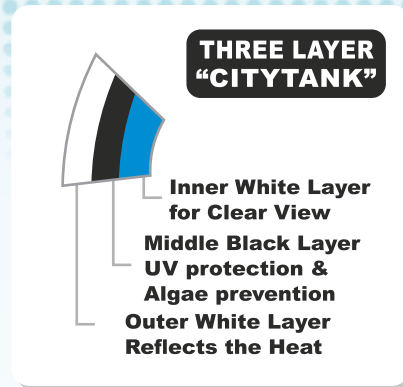

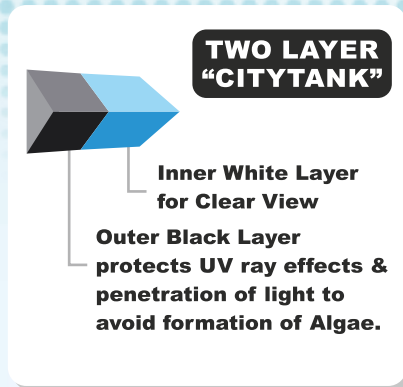

Install the products on strong base with flat surface (free from sharp pointing metal stone on surface) and must be installed with full bottom support. The installed place must be far from fire or hot objects.

Use the drill machine to make holes on the tank at specified location one inch above the bottom surface area.

Inlet an outlet pipe line must be [provided with proper support in order to avoid any included pressure on the tank body.

Use professional plumbers for installation of the tank and follow the guidelines mentioned on the products.

Products are designed to install above the ground. Do not use for underground water storage purpose.

Available Size 500 Ltr. to 5000 Ltr.
